FINANCIAL AND COMMERCIAL

An Epitome of the Week's Transactions.

COURSE OF THE MARKET.

As the late Dr. Watts had occasion to remark, 'Another week day's work is done," which is about the best that can be said of it, as it has brought no great amount of pront or satisfaction to anybody. Referring, of course, to the stock market, we find the week to have been a comparatively quiet one, marked by moderate changes in prices and inclined toward the end to weakness. For most of the time, however, it was wen sustained by a quiet but peristent buying of long stocks, which operators aperdashers, against the "spring opening." This was partially checked, however, on Friday and Saturday by the sharper rates for money, the bad bank statement and the growing prospects of Congress taking some action which, if it does not extend to the withdrawal of the egal tenders, will eliminate from them some of their langerous features. While the soundest commercia nking houses in the country are of one mind as to the necessity of some restriction to the greenack issue the dyed-in-the-wool speculators are opsed to it. They fear a check to a new harum arum inflation of prices, and have no taste for a stina lente advance that would only keep pace with the real prosperity of the country. Consequently they "cry havoe" to values, predict panies and make themselves and everybody else needlessly uncom-fortable. With the legal tender clause withdrawn which is about all we can hope for at present) some sort of surety is given against these very panies which are dreaded and may become imminent should short crops and ss in importations call for large exportations of gold. Otherwise it does not appear that the greenback will be a less desirable circulating medium, or that, as an unsecured government due bill-which s all it is now-it will be less valuable than it was fore. To the extent that a portion of it may slowly trickle into the treasury and remain there it would be of positive good in releasing an equal amount of useless gold and silver and in lessening to a corresponding degree the greatest danger which threatens our financial system. The stock market was with-out special features. Erie, like a confirmed invalid, ad its good and bad days, but its case defeats the agnosis of both bull and bear doctors. Western Union and its side partner-Atlantic and Padeclared handsome extra dividends, but in a rather contradictory manner settled down in price the moment they had done so-Perhaps they are reading the handwriting upon the wall which the new American Union Company is inscribing in a good round hand, and which reads:-"Four millions of stock against forty-one millions, and a direct competition established for seventy-five per cent of the best telegraphic business." The strenuous attempts at a co-operative suspension of soal production were abandoned as impracticable, nd the companies are left to go upon their own hook. Prices were well sustained, however, particularly Jersey Central, which is expecting to benefit by a large addition to its oil traffic. Kansas and Texas was the favorite of the Western roads, with large transactions in its bonds. The San Franciscos were mysteriously weak, and in other stocks there were no changes of

sactions at the Board during the week foot up 1,783,654 shares against 1,839,000 last week and 1,929,738 shares for the week ending November 29. Following is a synopsis of the business done during the past six days. An * indicates that there were no sales of the Stock Board yesterday, and the "closing" figures represent the last actual sale :-

BASEBALL.

There was a meeting appointed to be held in this city a few days since of leading baseball men. The avowed object of the meeting, which was to have been composed of delegates from Albany, Baltimore, Buffalo, National, Springfield, Troy and Worcester clubs, was the formation of an Eastern League—charging only twenty-five cents admission fee. Second thoughts on the part of the men of the clubs mentioned, that belong to the National Associ-ation, caused them to abandon the matter. Conse

quently there was no meeting.

On Saturday last a club sailed from this port on the Cromwell line's steamer Knickerbocker for New Orleans. They are under the control and management of Mr. Frank C. Bancroft, last year's manager Orleans. They are under the control and management or Mr. Frank C. Bancroft, last year's manager of the Worceater Club, and are engaged by him for the same positions again for the season of 1880. During the winter months, however, he will travel in the warmer latitudes and return in time for next season's duties. The men he has taken with him are Nichols, pitcher; Bennett, catcher; Sullivan, first baseman; Irvine, second baseman; Whitney, third baseman; Irvine, short stop; Wood, left fielder; Bushong, centre fielder; Knight, right fielder, and Ward, tenth man. They are to play in the Crescent City at Christmas and New Years. Their next appointment is in Havana, Cuba, until January 15. They then return to New Orleans and go to Texas. On their way home they play in Memphis, St. Louis, Chicago, Cincinnati and Cleveland.

At the recent meeting at Buffalo of the League in annual convention the following officers were elected, namely:—Mr. Hulbert, of Chicago, President; Mr. Young, of Washington, secretary; Messrs. Evans. of Cleveland; Sage, of Buffalo; Soden, of Boston, and Mr. Thorner, of Cinciunati, directors for the onsping year. The Board is completed by the addition of Mr. Hulbert, who is ex-officio a member of that body, as president of the League. This choice of directors, coupled with the factof the Chicago presiding officer being a member, gives the West the control of the Beard.

Bofore adjourning their annual meeting the Con-

being a member, gives the West the control of the Beard.

Before adjourning their annual meeting the Convention of the League voted to hold another convention at such time as the President might designate. This is not to be a special meeting however, which would have to confine its business to the matters for which it had been called, but is to be one at which any general legislation may be transacted for the benefit of the body. It is thought that it may occur in March, at the time when the schedule for next season's playing will be announced. The committee to arrange the games for 1880 consists of the President (Hulbert) and Mr. Soden, of Boston.

Two of last year's Jessey City Club, Esterbrook and Clinton, have enterest into written contracts to play next season with the Springfield Club, of the National Association.
